

Product datasheet

Specifications

Mechanical interlock unit for MC3-100 ~ 150

AR-100T150MC3

Standard	IEC 60947-4-1
Device application	The AR-9 is a mechanical interlock that, when installed between two contactors, prevents them from closing simultaneously to protect electrical circuits and is commonly used in reversing, power transfer, or star–delta applications
Range of product	Contactor code MC3-100 ~ MC3-150
Product or component type	Mechanical interlock
Interlocking type	Mechanical
Electrical circuit type	Reversing Changeover
Installation side	Side-mount
